

Amp'edUPdate

Making Bluetooth Networks Smarter!

Amp'ed RF Technology presents a new concept for managing your Bluetooth embedded software: **Amp'edUPdate**. Using the same Bluetooth radio, our Amp'edUPdate feature allows users to update and replace older versions of Amp'edUP Stack, Bluetooth profiles, and higher layer application.

Benefits

- Add new features and value concepts to existing Bluetooth modules.
- Eliminate future compatibility and defect risks.
- Supports custom application updates.
- Runs on existing platforms – no HW changes needed.
- Easy to use smart phone app available for end users.

Wireless Amp'edUPdate Networks
